*Allowable Subject Matter*

Claims 21-40 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not anticipate nor render obvious the claimed subject matter of: a self energising friction clutch comprising; a shaft which is rotatable about its axis, a clutch disc which is concentrically fixed to the shaft, engaging means for disengaging and engaging the disc from and with structure adjacent the disc, including a wedging arrangement which includes a wedge member having a wedge angle [  $\alpha$  ], a first face of which rests on a first face of the disc with the second face of the wedge member, opposite its first face, tapering towards the first face of the member in the direction of rotation of the disc and from a first end of the wedge member towards the smaller second end of the wedge member, an actuator for moving the engaging means between its disengaged and engaged positions of operation, including a pin which passes through the structure in a direction normal to the disc face and carries a head which has a formation which projects beyond the side of the pin to bear on the first end of the wedge member, and a ramp formation, which is fixed to the structure and on which the second face of the wedge member is movable by the actuator in the direction of rotation of the disc between its rest position on the disc and a second position to which the disc is progressively locked by wedging action to the structure with the locking force applied by the wedge member to the disc, during rotation of the disc, being substantially greater than the actuator force required to move the wedge to its locked position with the disc stationary relatively to the structure.

No particular single feature of the claim renders the claim as a whole patentable. Only the claim taken as a whole combination is deemed new and unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed December 20, 2005. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of the references show all of the features of the claimed invention, nor do they show that it would have been obvious to one of ordinary skill in this art at the time the invention was made to combine features therefrom to create the claimed invention.
